Profile

I am a Senior Software engineer with 9+ years of experience designing and delivering scalable enterprise applications, APIs, cloud-native solutions, and microservices architectures within Agile environments. Experienced in translating business requirements into secure, scalable, and maintainable technical solutions across web, mobile, and backend platforms. Strong background in cloud technologies, enterprise integrations, system modernization, and cross-functional collaboration. Proven ability to mentor teams, lead technical initiatives, and support architecture decisions aligned with business objectives.

Technical Capabilities

- **Backend Technologies :** Node.js, Python, PHP, Java, C#, Laravel (MVC), Express.js
- **Frontend Technologies:** React, Angular, VueJS, TypeScript, React Native, JavaScript, jQuery, Bootstrap, Ionic, HTML, CSS,
- **Database:** MySQL, Oracle, MS SQL, PostgreSQL (Postgres), MongoDB, MariaDB, PostgreSQL, Redis
- **Architecture & Integration:** REST APIs, Microservices, Distributed Systems, OpenAPI/Swagger, Event-Driven Design, System Integration
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, ECR), Azure, GCP, Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, Jenkins.
- **Enterprise Platforms & Tools:** ServiceNow, Salesforce, Jira, Confluence, Figma, GitLab, New Relic, Dynatrace, Kibana, Postman, Apidog, Oracle Knowledge Management Stripe, Paypal, BrightSpace
- **AI tools:** Anthropic Claude, Google Gemini, Github Copilot, ChatGPT
- **Methodologies:** Agile/Scrum, DevOps, CI/CD, Test Automation

Employment Experience

Full Stack Developer

June 2022 - Present

Bell Canada, Mississauga, ON

- Designed and developed scalable enterprise-grade REST APIs, microservices and cloud-native architectures, supporting high-volume business transactions.
- Collaborated with architects, product owners, QA teams, and business stakeholders to translate business requirements into technical solution designs and implementation strategies.
- Contributed to end-to-end solution architecture for large-scale web applications ensuring scalability, accessibility, maintainability, and performance optimization.
- Conducted code reviews, enforced development standards, and mentored developers to improve code quality, maintainability, and delivery velocity
- Worked with cloud technologies including AWS and Azure to support scalable and resilient application deployments.
- Implement continuous integration and delivery (CI/CD) to deploy the code to various environments

Professor (Part time)**January 2023 - Present**

George Brown College, Toronto, ON

- Deliver undergraduate courses in Database Management, Advanced Database Management, Agile Methodologies, and Software Development
- Design and continuously enhance curriculum, course materials, assessments, and hands-on labs aligned with program learning outcomes and industry best practices.
- Develop real-world project-based learning experiences focused on database design, application architecture, Agile delivery, and software engineering principles.
- Mentor and coach students through capstone projects, code reviews, technical presentations, and collaborative development activities.
- Evaluate assignments, examinations, and project deliverables while providing detailed technical feedback to support student growth and learning outcomes.
- Stay up to date with emerging technologies and software engineering trends to ensure course content remains aligned with industry demands.

Instructor (Part time)**January 2023 - Present**

Robogarden Inc., Calgary, AB

- Proficiency in front-end technologies (HTML, CSS, JavaScript, jQuery, Angular, React), back-end technologies (Node, Express), databases (MySQL, MariaDB, PostgreSQL, MongoDB) and mobile application development (React Native)
- Teach software engineering fundamentals including API development, database design, responsive web development, and application architecture.
- Mentor aspiring software developers through project-based learning, debugging exercises, code reviews, and technical problem-solving sessions.
- Evaluate technical assignments, capstone projects, and coding assessments while providing actionable feedback to improve code quality and development practices.
- Continuously update training materials to reflect evolving industry standards, frameworks, and development tools.
- Support students in applying Agile methodologies, Git version control, and collaborative software development workflows.

Senior Web Developer**March 2020 - November 2021**

Fourwit Technologies Pvt. Ltd, Mohali

- Designed and developed scalable web applications and enterprise solutions using Node.js, PHP, Laravel, JavaScript, Angular, Vue.js, HTML5, CSS3, Bootstrap and RESTful APIs.
- Collaborated with clients and business stakeholders to gather requirements, define technical specifications, and deliver customized software solutions.
- Architected and implemented backend services, database models, and API integrations to support business-critical workflows and third-party systems.
- Developed responsive, cross-browser compatible web applications focused on performance, usability, and maintainability.
- Integrated applications with external services and relational databases including MySQL and NoSQL, ensuring data integrity and system reliability.
- Participated in code reviews, troubleshooting, debugging, and performance optimization to improve application stability and user experience.
- Managed source control and release processes using Git while contributing to Agile development practices and sprint planning activities.

Software Developer

June 2017 - August 2019

Techcom Software Solutions, Woodbridge

- Developed and maintained business applications using PHP, JavaScript, HTML, CSS, jQuery, and MySQL in accordance with technical specifications and business requirements
- Participated in application enhancements, feature development, and system modernization initiatives within Agile development environments.
- Collaborated with cross-functional teams to deliver secure, maintainable, and high-performing software solutions.
- Assisted with deployment, production support, and troubleshooting activities
- Perform coding to business requirements/technical specifications, industry standards, and internal company standards and design guidelines

Computer Programmer

May 2016 - June 2017

Activation Laboratories, Hamilton

- Developed and maintained internal business applications and CRM solutions used to manage customer and operational data.
- Designed, optimized, and maintained relational database structures to improve application performance and data accessibility.
- Collaborated with business users to analyze requirements and implement software enhancements that improved operational efficiency.
- Participated in Agile development processes including sprint planning, backlog refinement, and iterative software delivery.
- Created technical documentation, test plans, and system specifications to support development and maintenance activities.

Soft Skills

- Excellent communication skills in written, verbal, speaking & presentation work.
- Able to deal effectively with users at different levels of technical ability
- Work independently as well as part of a team
- Strong time management skills, able to meet timelines and achieve goals

Certificates:

- SAFe 6 Product Owner/Product Manager
- Google Cloud Digital Leader (2024)
- Bell University – Cloud Architecture Program

Education

Cloud Architect, Bell University

February 2024 - November 2024

- Learning the cloud Fundamentals, Principles, Migration with an introduction to Python, Git, GitLab, Docker, Kubernetes, CI/CD pipeline.
- Learning about Cloud Management tools like Ansible and Terraform with an introduction to Data warehousing, Cloud Services like Dataflow, Cloud Functions, Pub/Sub and BigQuery.

Computer Programmer, Sheridan College, Brampton

January 2015 - April 2016

- Completed a 2-year program that develops skills through practical experience and innovative courses in systems design and implementation, programming, networking, windows servers, databases and web technologies
